Description	Definition
<b>Hispanicity™</b>	<b>Hispanicity is a CultureCode® measuring the degree to which people of Hispanic heritage in the United States retain elements of Hispanic culture while they acquire elements of American culture. The following descriptions are typical for the acculturation segments. However, there is greater variability of the key attributes within each segment including language usage, foreign born vs native born, years in United States and number of generations in the U.S.</b>
Hispanicity Segment (Hispanic Acculturation)	A geographic classification into the five acculturation segments based on the distribution of Hispanic population over the five Hispanicity segments. Values range from HA1 (very acculturated) to HA5 (unacculturated).
Hispanicity: Americanizado (HA1)	English dominant (nearly no Spanish); born in U.S. and often 3rd+ generation; has few Hispanic cultural practices
Hispanicity: Nueva Latina (HA2)	English preferred (some Spanish); born in U.S. and typically 2nd generation; some Hispanic cultural practices and often "retro-acculturate"
Hispanicity: Bi-Cultural Hispanics (HA3)	Bi-lingual (equal or nearly); immigrated as child or young adult; has many Hispanic cultural practices
Hispanicity: Hispano (HA4)	Spanish preferred (some English); immigrated as adult and in U.S. 10+ years; predominant Hispanic cultural practices
Hispanicity: Latinoamericana (HA5)	Spanish dominant (nearly no English); recent immigrant as adult (less than 10 years ago); primarily Hispanic cultural practices and identifies with home country more so than U.S.
<b>Socioeconomic Status (SES)</b>	<b>A blend of income, education, occupation and housing characteristics. Households are grouped into common segments with an A-E status. "A" is the highest level of socioeconomic status while "E" is the lowest level. The following descriptions are typical for the SES categories. However, there can be greater diversity within a category, particularly for household income and educational attainment.</b>
Upper Class (SES A)	Households with over \$100,000 annual household income, 4 year college degree or graduate degree, owned housing, and employed in professional occupations.
Upper-Middle Class (SES B)	Households generally between \$75,000 and \$200,000 annual household income, some college or higher education, owned housing, professional or skilled occupation.
Middle Class (SES C)	Households usually between \$40,000 and \$125,000 annual household income, high school graduate to some college, and employed as skilled labor or service worker.
Lower-Middle Class (SES D)	Households typically between \$25,000 and \$60,000 annual household income, high school or lower education, rented housing, employed as service or labor worker.
Lower Class (SES E)	Households most often below \$35,000 annual household income; less than high school education; rented housing, labor or service worker or unemployed.
<b>Hispanic Language Usage</b>	
Hispanic Language Usage Segment (English-Spanish Language Usage)	The Hispanic Language Usage Segment indicates the overall language preference (English versus Spanish) for Hispanic households and population. Geographies are assigned one of the five codes based on language preference. HL1: English Dependent HL2: Bi-Lingual English Preferred HL3: Bi-Lingual English & Spanish Equally Used HL4: Bi-Lingual Spanish Preferred HL5: Spanish Dependent
